

DRUMLESS STUDIO - THIRD-PARTY NOTICES
Version 1.0.0 - 22 August 2026
=====

Drumless Studio incorporates the third-party software and model files listed below. Each component remains the property of its owner and is used under the licence shown. Licence notices are reproduced in PART B or supplied as separate licence files alongside the App, as identified below.

Drumless Studio does NOT include, provide or grant rights to any musical recording or composition. It processes audio supplied by the user. See the End User Licence Agreement.

PART A - COMPONENTS
=====

1. FFmpeg
Licence : GNU Lesser General Public License v3 (LGPL-3.0)
Website : <https://ffmpeg.org>
Build : ffmpeg-master-latest-win64-lgpl, <https://github.com/BtbN/FFmpeg-Builds>
Verified: build configuration contains no --enable-gpl; libx264, libx265 and libxvid are explicitly disabled. Confirmed from the exact bundled binary's own -version output on 4 August 2026.
Notes : Distributed as a separate, unmodified executable (ffmpeg.exe) and invoked as an independent process. Drumless Studio does not link against FFmpeg libraries. Under LGPL-3.0 section 4 you may replace the bundled binary: substitute <install directory>\ffmpeg.exe with your own compatible build. Complete corresponding source for the bundled build is available from the FFmpeg project and the build repository above.
2. Demucs (Hybrid Transformer Demucs) - model weights bundled
Licence : MIT License - Copyright (c) Meta Platforms, Inc. and affiliates

SoundFile : BSD 3-Clause License - Copyright (c) 2013 Bastian Bechtold

 Authors : Anjok07 and aufr33 (UVR project) and contributors
 Project : <https://github.com/Anjok07/ultimatevocalremovergui>
 Source : https://github.com/TRvlvr/model_repo/releases/
 (resolved by the audio-separator package at runtime)
 Purpose : Optional lead / backing vocal separation
 Credit : The UVR project asks that third-party applications using its models credit UVR and its developers. That credit is given here.
 Notes : These weight files are downloaded on demand to the user's own machine and are NOT redistributed inside this package. The UVR repository licenses its own source code under the MIT License but publishes no separate licence for the model weight files.
